

**Safety  
Footwear**

***DSI SAFETY INC. KNOWN AS DYNAMIC SAFETY INTERNATIONAL IS A CANADIAN OWNED AND OPERATED COMPANY.***

**Our Goals**

- No compromise on quality
- To offer the best service level in the industry
- To be as price competitive as any good quality import
- To be our own master in our own country (Canada)
- To answer all the needs of the Canadian workers

**Our Manufacturing Process**

The outside must look good. We know how to design great styles people will want to wear.

But what we care about the most is what goes inside.

In all of our products we put

a support “shank” in the sole while only few other manufactures do.

The footbed of a boot or shoe determines the comfort the customer will feel. The insole sits on a “Textron” board with a fiber or metal shank and a poron layer. A Kevlar® “Lenzi” plate is beneath welded to the sole offering CSA puncture resistance. Most other manufactures use only a Lenzi plate with a regular insole.

Our manufacturing process is a “Cementex Lite” process; not an injection process. This process is used by most producers of high end quality shoes in the world. Compared to injection, this process offers much more reliability in the quality of construction compare to other processes. It also gives us a higher degree of flexibility to produce a wide variety of different styles and sizes on the same production shift.

This process enables us to offer excellent service to our customers.

Our goal is to be able to give our customers ultimate service on all our domestic production and fill rates on all models and sizes.

**Who are we?  
We are unique  
and why!**

We are a Canadian owned company and we manufacture 80% of our footwear here in Canada.

Our products are made in Canada, by Canadians for Canadians!

## We are unique and why!

- We are the only Zero-Metal footwear manufacturer in Canada.

- We are the only “True 5E” width Zero-Metal manufacture in Canada.

- We are the only Canadian manufacture to offer a true solution to slips and falls during our harsh Canadian winters.

- We are the only Canadian manufacture to offer a solution for people with large leg calves.

- We are the only manufacturer to offer a complete line of felt boots. The only true solution to counter the harsh canadian winter and the perfect solution for freezer workers in the food industry

## We are unique because we care about our customers.

- We have resolved the problem of people requiring wider shoes and boots by introducing “True 5E” width shoes and boots.
- We have resolved the problem of people with large leg calves by designing the right model that solves the problem.
- We have found a solution for slips and falls occurring in the winter with our “Dyna-Spike” system
- We are working hard on many other problems that are encountered by Canadian workers and we are doing our best to come up with more solutions!
- We are presently working on an offering of size 14,15 and 16 as well as size 3 and 4 in order to satisfy the 1% of the market who needs a solution to either smaller or larger feet.

## A complete product offering

*Shoes - Joggers - 6” boots - 8” boots - 11” boots*

- Full Metal
- Hybrid
- Dyna-Felt (Felt Boot)
- Zero-Metal
- Zero-Metal “Bigfoot 5E”
- Large leg calves solution
- Dyna-Spike system
- Uniform Collection
- Zero-Metal Metatarsal offering

## Our final objective

To be recognized has the company with all the footwear solutions for canadien workers needs. You have a problem let us know then we will work on a solution!

# SAFETY & UNIFORM SHOES

**SAFETY IS IMPORTANT!  
BUT COMFORT IS AS JUST AS IMPORTANT!**

You will choose them for safety. But once you have worn them, you will no longer want to part with them. Our ultra-comfortable safety shoes are the ideal choice of all workers.  
When safety is mandatory, choose Dynamic Safety footwear!

## ECONOMICAL SAFETY BOOTS

**FOR THOSE WHO WORK IN LIGHT INDUSTRIAL ENVIRONMENTS!**

For those who work inside (warehouse and plant workers) and/or outside during summer. While the PU sole is very good and light for summer work it has a tendency to get hard and slippery during the winter. These products are well conceived and offer comfort and durability at economical price.

## UNIFORM SAFETY BOOTS

**BECAUSE YOUR UNIFORM MUST BE COMPLETED BY A PAIR OF BOOTS THAT MUST MATCH THE QUALITY OF YOUR UNIFORM, THE ONLY CHOICE IS DYNAMIC!**

Warm feet and solid grip on all kinds of terrain the answer is Dynamic Uniform boots. For winter use try our model Yukon SF57011 that include the Dyna-Dry waterproof membrane and the Dyna-Spike sole. For summer use have a look at our model Fraser (SF59411 & SF5901) and OMI (SF49411 & SF49601), total quality and comfort.

### OMI SF49411 & SF49601

- Full grain leather and nylon
- Viko foam insulation
- Cambrelle lining
- Dyna Flex insole
- Soft toe
- Double density VIBRAM DRY ICE EVA / Rubber outsole (Fire & Ice™)
- Black
- Size: 3E (SF49411) 5,6,7-11,12,13  
5E (SF49601) 6,7-11,12,13

### FRASER SF59411

- Full grain leather and nylon
- Viko foam insulation
- Cambrelle lining
- Dyna Flex insole
- Soft toe
- Double density VIBRAM DRY ICE EVA / Rubber outsole (Fire & Ice™)
- Black
- Size: 3E (SF59411) 5,6,7-11,12,13

### FRASER SF59601

- Full grain leather and nylon
- Viko foam insulation
- Cambrelle lining
- Dyna Flex insole
- Soft toe
- Double density VIBRAM DRY ICE EVA / Rubber outsole (Fire & Ice™)
- Black
- Size: 5E (SF59601) 6,7-11,12,13

### YUKON SF57011

- Full grain leather
- 200 gr. Thinsulate insulation
- Dyna Dry waterproof membrane
- Cambrelle lining
- Dyna Flex insole
- Soft toe
- Double density VIBRAM DYNA SPIKE EVA / Rubber outsole (Fire & Ice™)
- Black
- Size: 3E 5,6,7-11,12,13

### What's an hybrid

Half metal plus half puncture resistant Kevlar® material.

The old fashioned way to build a safety shoe with a pinch of new technology. Meaning a steel toe combined with a Kevlar® midsole and a composite shank, offering a compromise between all metal and Zero-Metal at a highly competitive price.

### What is Zero-Metal

A safety shoe with NO metal at all, not even the eyelets which are made of plastic. A safety toe made of a composite material, a midsole made of Kevlar® and a composite shank. Results: lightweight, no conductivity of electricity but most of all, prevents the cold from being transferred to your feet in the winter. Final result: a much more comfortable shoe.

### What is a Zero-Metal Bigfoot

There is between 5% to 15% of all Canadian workers who are in a need for a wider shoe or boot than what the market actually offers (3E widths). A few manufacturers offer wider footwear but they all offer only half of a solution as they offer wider footwear with the same narrow safety cap that are used for 3E width shoes. None of them offer a Zero-Metal solution.

At Dynamic we offer a Total Solution. The Zero-Metal Bigfoot 5E width in shoes and boots with the adequate size composite toe cap. Most of all we do not ask the consumer for an extravagant price premium to solve this problem because we believe that you deserve to be served well like everyone else.

### The Dyna-Spike System

The only real "Anti-Slip" solution available.

Removable ergonomic Spikes are easy to install and remove when needed or not.

The "Ice Grab" spikes offer such a low profile that they do not interfere when you are driving or when you are walking on snow, ice or icy concrete.

Full offering for any job. Ideal for postman, hydro meter readers, miners, construction workers, or truck drivers who get in and out of their truck all day long.

Note: Slips and falls in the workplace are the biggest problem being encountered by employers and employees for lost time injuries. Dyna-Spike is the solution for icy conditions.

## Uniform shoes and boots **UNIFORM**

Great look and long lasting comfort is our goal. Well designed and comfortable shoes and boots for people who wear uniforms is something that we are proud to offer for police officers, fire fighters, security guards and military personnel. We offer boots and shoes in 3E and 5E width.

### Metatarsal boot

Have you ever seen a Metatarsal boot totally Zero-Metal?

If you have not seen one yet, you will see it at Dynamic.

Right now we offer external metguard but we are working on a unique product that will offer you an highly flexible inside metatarsal. We feel we should be able to introduce this new product soon. In the meantime, have a look at our offering.

### Zero-Metal Bigfoot 5E

Who else but Dynamic would be ready to invest in a niche where volume is low. However we feel that there is a need for those who have large feet and those who need bigger size shoes.

Have a look at our offering and see how we cure the problem and offer a total solution to the market. We even had specially made toe caps for the ultimate fit.

### The large leg calves solution

People with large leg calves have always had difficulties regarding boot selection. Most of them cannot lace their 8" boot to the top and unfortunately feel uncomfortable all day long. At Dynamic, we have found a solution to this problem: we have designed a 6" boot that looks and feels like an 8" boot. We have done this by designing the boot in such a way that you can lace the boot entirely up to the 8" in the front and have an open back to the height of 6" with comfortable padded collar. And it works! Even truck drivers and heavy equipment operators with regular calves find it the perfect solution.

# MAX-SIL ACCESSORIES

**EXCELLENT SAFETY FOOTWEAR,  
REQUIRE GREAT CARE!**

Protect and take care of your footwear with Max-Sil accessories. The leather care accessories will keep your feet dryer and your footwear lasting longer.

## LEATHER CARE PRODUCTS
